**TEKTRONIX AND OPENCUBE TECHNOLOGIES ANNOUNCE
COLLABORATION**

Tektronix selects the OpenCube MXF Toolkit for its Cerify™ MXF capabilities

TOULOUSE, France – October 26, 2006 – OpenCube Technologies has licensed its MXF Toolkit to Tektronix, a world leader in test, measurement, and monitoring for use within Tektronix' Cerify™ - the world's first fully automated system capable of verifying the quality of file-based, compressed digital video and audio content prior to transmission. Thanks to OpenCube's Toolkit, Cerify™ is now also able to support all files in the now-industry-standard MXF file format.

Over the last decade, most broadcasters and production companies around the world have embraced the transition to digital technology and MXF. The Material eXchange Format as defined by SMPTE has become the industry standard file-interchange format. Since both companies are driven by the same ambition — to provide excellence *and* reliability — award-winning OpenCube Technologies is the ideal partner for Tektronix.

The OpenCube MXF Toolbox has proven to be the highest-performing of the industry and has shown high reliability, especially with Linux operating systems in 64 bits. The MXF Toolbox has exceeded even the expectations of Tektronix. The combination of OpenCube MXFTk® with the new Tektronix Cerify™ system is the answer for broadcasters and content providers looking to simplify their content-management processes, while improving the overall quality of the products and service they provide to their customers.

"Our Toolkit has been created to facilitate the integration of all MXF file formats," says Benoit Fevrier, President and CEO of OpenCube. "We are very pleased to be able to provide our world-class expertise in MXF technology to Tektronix. Adds Fevrier, "Our team's extensive experience and expertise in MXF development and metadata management enables us to always stay on top of this highly competitive market and ever-evolving industry. "

About OpenCube Technologies

Created in August of 2003, award-winning OpenCube Technologies is a pioneer in the field of video/IT technology integration, with world-class expertise in MXF development, metadata management, and media-data interoperability.

OpenCube invests heavily in R&D, developing advanced and innovative solutions that ensure its position as a world-class leader in its area of expertise - MXF and HDTV Standards.
