

A simple tool to handle your MXF P2 content

View, Ingest and Log all types of P2 HD media (AVC-I – DVCPProHD)

P2Soft HD v2.2 is a pioneering solution for viewing and logging P2 media in the field, and for automating the ingest process for your production facility.

P2Soft HD v2.2 has been widely adopted by TV Channels and the production industry as a powerful tool for boosting P2 Tapeless Workflows.

Advantages:

- ▶ Complete and reliable AVC-I support
- ▶ Faster than real time ingest with sub-clipping and rewrapping features
- ▶ Automatic Avid Interplay check-in with metadata conservation

New with version 2.2

- AVC-I support
- Ingest queuing with sub-clip creation
- Smooth ingest in Avid ISIS/Interplay environment
- Enhanced performances (>4x faster than real time with P2Media 100Mbps)

"A fast, interoperable and comprehensive tool to manage your MXF P2 files."

P2Soft HD

v2.2

Rationalize P2 ingest processes

P2Soft is a cost-effective solution for streamlining P2 Media ingest into your production facility. The capture process is automatically launched as soon as one or several P2 cards are inserted into the P2 Drive.

The clips can be directly browsed from the card whether the content is HD or SD. An intuitive and ergonomic media management interface facilitates editing, sub-clipping, and program consolidation.

P2Soft was designed for moving P2 clips efficiently and rapidly. Its features enable you to unwrap or rewrap P2 clips so that they are interoperable with all types of production equipment.

The Ingest process has been optimized and is now 4x time faster than real time with 100Mbps AVC-I and DVCPProHD workflows using P2 Drive AJ PCD35.

Move P2 Media content into Avid production environments

P2Soft is a powerful and robust solution for transferring P2 media into Avid environments. The GUI allows you to select the Interplay "Catalog", the destination share storage and the metadata you want to transfer from the P2 cards to the Avid Database.

P2 media can be selected, sub-clipped and queued into an ingest list, making the Ingest process easy and straightforward.

P2Soft takes over the rewrapping of the MXF media, the copying of the clips in the selected directory, and the checking in Interplay via a Web Service API.

Ensure metadata security for efficient workflows

P2Soft offers a complete set of tools for metadata management for your P2 workflow. Metadata can be selected and uploaded in the P2 Camcorder directly in the field using the SD card. The metadata can then be modified for logging and preserved during the entire P2 media lifecycle.

Key features

Essences

- DV IEC25, DVCPPro 25, DVCPPro 50, DVCPProHD 100, AVC-I 50, AVC-I 100

Metadata support

- Locked, editable or hidden XML metadata
- Metadata updating on P2 Camcorders with a P2Card

Application

- Browsing of MXF P2 media content
- Automated recognition of 16/9 and 4/3 display formats
- Spanning management (continuous sequences recorded on different cards)
- Manual or automated ingest function
- DV unwrap
- MXF Op1a rewrap
- In/Out selection
- Filter search mode
- FTP transfer

Timeline

- Cut/Edit Timeline
- MXF sub-clip creation with Timecode In and Timecode Out
- Memo Text and Memo Voice creation on dedicated tracks
- Voice-over creation on audio tracks
- Consolidation in the Timeline (MXF - AVI)
- Possibility of creating an ALE format EDL before editing

Minimum system requirements

- Windows XP & Vista
- Works with PCMCIA Slots, AJ-PCD P2 Drives or Panasonic P2 Camcorders

Customization for 5 options

- Ingest option
- Avid Ingest option
- Timeline option
- DVCPProHD option
- AVC-I option

OpenCube Technologies SAS has significant expertise and experience in providing flexible and cost-effective MXF-format solutions, as well as MXF and HDTV-standard media content management services.

The company develops HD/SD ingest gateways and innovative advanced technology applications for streamlined workflows and for effectively managing media content lifecycles, including capture and digitization, delivery and archive, display and record, convert, re-purpose and re-use.
